

Aluminium Labels

50x25mm

Aluminium Foil Asset Labels- Manufactured from 0.13mm anodized aluminium with a 3M multipurpose adhesive. with 0.13mm aluminium foil label you get the properties of metal with the benefit of flexibility of a label, giving you a hardy label that will a fix to curved surfaces.

As a basic rule of thumb, anything you can achieve creatively with paper, can also be achieved by us with a synthetic label.
